

supporting the systems that support you

Your Virtual IT Department

**Weekly technical reports
on the health of your
infrastructure**

**Take the headache out of
managing your technology**

Email outage, server crashes, spyware, service pack, virus outbreaks. Isn't technology supposed to be making the process of doing your business easier? How do you grow your business when you're constantly fighting the technology that's supposed to be helping you.

If this scenario sounds familiar then Armada Solutions can help. Our Managed IT Services solution allows you to outsource the management of your internal IT systems allowing you to focus on the business at hand. Let us support the systems that support you.

Our expertly trained staff monitor and maintain your systems, pro-actively responding to warning signs before they become incidents. You will receive weekly reports on the health of your systems in plain English - not technobabble - so you are always up to speed with the state of your infrastructure. And if something does go wrong, you can rest assured that you have an expert team of IT engineers behind you. It's your virtual IT department.

At Armada Solutions, we understand you don't have time to waste supporting your IT systems. Let us take the headache out of managing your technology, because we know you have more important things to do. We'll do what we do best, so you can concentrate on what you do best. Your business.

Contact us today to see how we can help you.
